

Give Your Boat Wrap a **Second Life**

Kick off boating season the right way by recycling your boat wrap!

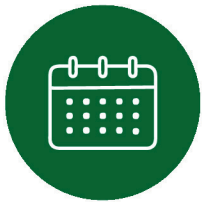

Who Can Recycle Boat Wrap:

Storage facilities, shrink wrappers, and others can recycle boat wrap. **Everyone** can help reduce waste and turn used boat wrap into future resources.

Where Collection Happens:

Collection takes place at participating businesses, marinas, boatyards, and designated drop-off locations. As locations become available, they will be listed on the website. Participating in the program helps bring the boating community together to recycle boat wrap responsibly.

When to Recycle:

Recycling boat wrap is encouraged at the start of boating season, typically in the spring. Stay tuned to learn when and where collection sites will be available.

What Happens to Recycled Boat Wrap:

Plastic boat wrap used for winter storage is transported to a certified recycling facility, where it is cleaned, shredded, and pelletized. These recycled plastic pellets are then used to produce new plastic film products, including black construction trash bags, helping keep valuable materials in circulation.

Why Minnesotans Should Recycle Boat Wrap:

Recycling boat wrap reduces waste, conserves valuable resources, and keeps materials in circulation for future use.
